“Hydroflux is an active expertise. All proposed solutions will be expert solutions, backed by skilled resources”

We know that the wastewater industry demands a high level of process and compliance. At Hydroflux, we strive to provide our customers the most practical, efficient and commercially sound solutions that consistently perform.

Whether we are providing businesses advice on sustainability matters, engaged in a design and construct contract for a wastewater treatment plant for an international food manufacturer or supplying new high quality screening systems for the world’s largest desalination plant, we will always take the necessary action to achieve the highest degree of quality and excellence.

By respecting industries problems, we discover the way forward.

The Hydroflux Group is diverse, yet unified and our skill and experience covers all aspects of environmental management and sets the example for others to follow.

## Improving our most valuable resources

## OUR BUSINESSES

Our experience in the water and wastewater field is first class and sets an example for others to follow. We are the business you can depend on.

Via our subsidiary companies, we can provide design services, supply of equipment, operation contracts and engage in complete design and construct projects for virtual any business sector be it manufacturing, food processing, desalination, or municipal wastewater treatment. Whatever your business, we have the knowledge and expertise.

Our technology division allows our business to keep one step ahead. Hydroflux Technology is the innovative arm of the Hydroflux Group.

Our engineers are unified, focussed and committed to the environmental industry and our product range is designed to be economic, efficient and environmentally considered. We confidently strive into the future putting innovative ideas and solutions into practise. This is why we are experts and this is why we excel at what we do.
